

Research Granting Agencies

In its set of eight fact sheets on *Research Granting Agencies*, the Association pour la recherche au collégial first presents an overview of the configuration as a whole, followed by specific information about the seven main agencies that, in Québec and throughout Canada, support public research in the areas of health, natural sciences and engineering, social sciences, humanities, fine arts and literature, as well as the acquisition or maintenance of the infrastructures needed for conducting such research.

ARC?

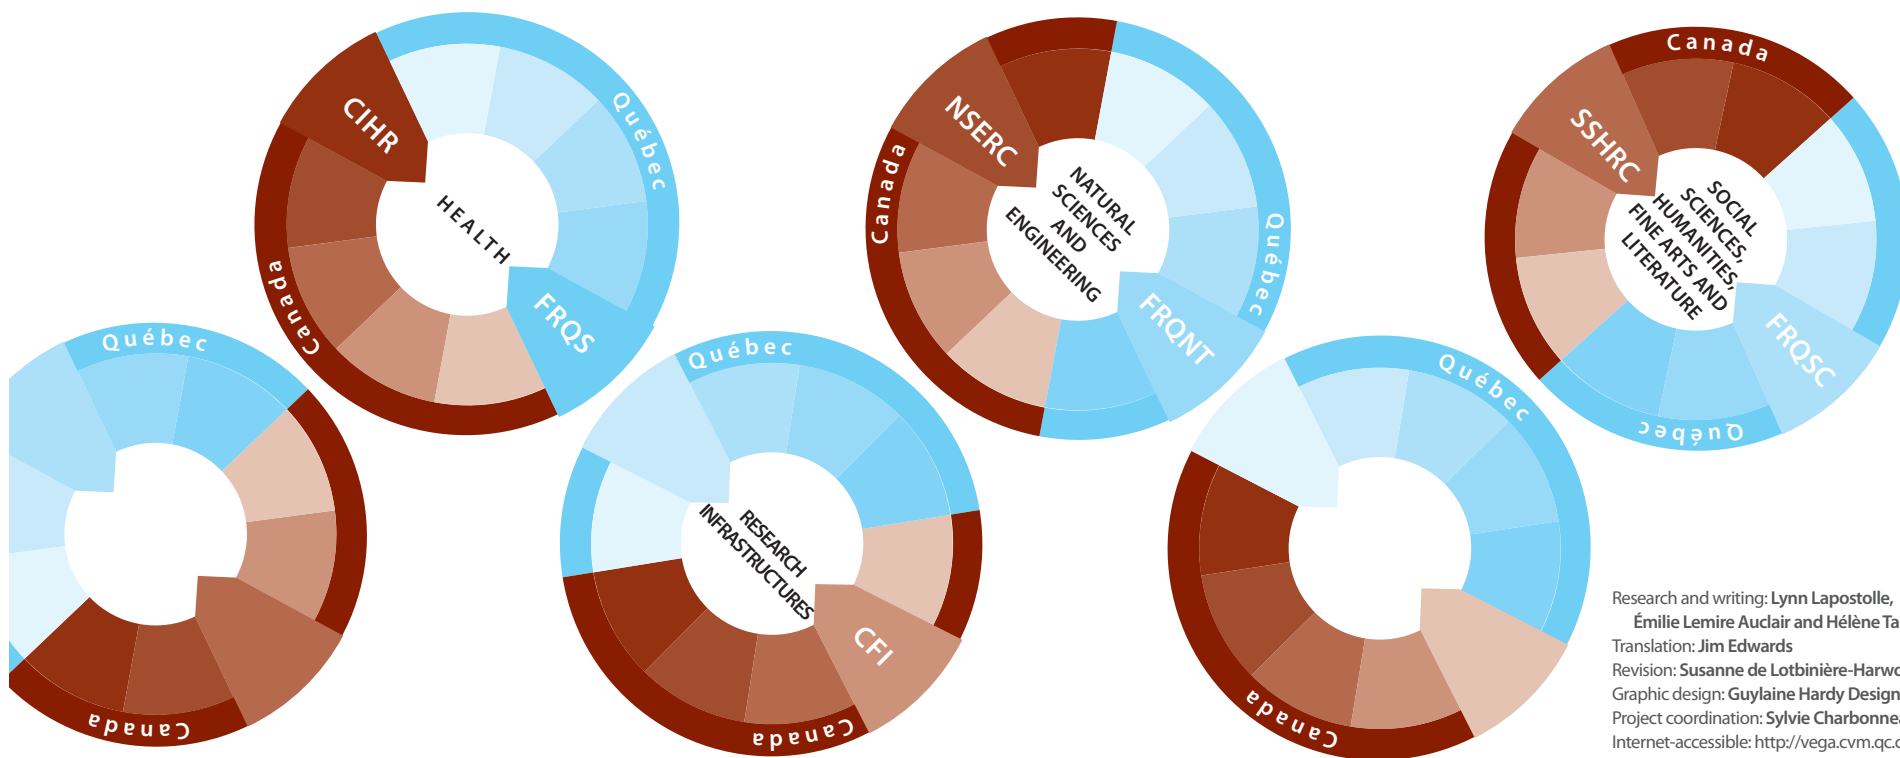

As a professional association, ARC fosters the development of research throughout the college system, in particular through the dissemination of position papers on research issues, the hosting of research-related activities and conferences, the establishment of research support measures, the awarding prizes and, more recently, through meta-research projects.
